of algebra by reorganizing and enhancing students' problem-solving tac-tics and strategies. The book further stimulates students' interest for future study of mathematics.

### 101 PROBLEMS IN ALGEBRA - MATHEMATICAL OLYMPIADS

every problem has a complete step-by-step explanation for the solutions. If you find yourself getting stuck solving a problem, you can look at the answer explanation and use it to help you understand the problem-solving process. As you are solving problems, it is important to be as organized and sequential in your written steps as possible.

Because  $(x^2)$  and  $(x^2 + 2x + 4)$  multiply to become  $x^3 + 8$ ,  $x^3 + 8$  factors into  $(x^2)(x^2 + 2x + 4)$ . Understanding multiplication patterns is the first step in learning to factor. Math 108 T3-Operations with Polynomials Page 2. II. Long Division Dividing two polynomials is very much like dividing two integers.

### MATH 108 { REVIEW TOPIC 3

Find the unknown rate in a percent problem 3. Find the unknown base in a percent problem 495 From your work in Section 6.3, you may have observed that there are three basic types of percent problems. These depend on which of the three parts"the amount, the rate, or the base"is missing in the problem statement.

Further in Section 5, problems from various mathematics competitions will be analyzed. Problems described in the present paper may be considered as outcomes of the experiment “What could happen if at real math contests additional tools would be allowed?”. Although most of the examples below come from various math competitions,

Algebra Word Problems Many algebra problems are about number relationships. In most word problems, one number is defined by describing its relationship to another number. One other fact, such as the sum or product of the numbers, is also given. To solve the problem, you need to find a way to express both numbers using the same variable.
