June 23 is the beginning of summer- well timed! I also am looking forward to being finished by about beginning of summer, with the trifecta of calculus books (spivak, courant and apostol; admittedly dependent on your work).

Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

In mathematics, an integral assigns numbers to functions in a way that can describe displacement, area, volume, and other concepts that arise by combining infinitesimal data. Integration is one of the two main operations of calculus, with its inverse operation, differentiation, being the other. Given a function  $f$  of a real variable  $x$  and an interval  $[a, b]$  of the real line, the definite integral

Cálculo de Varias Variables es un texto clásico para la enseñanza de esta interesante asignatura. El objetivo principal de los autores al elaborar este texto, ha sido lograr una comunicación efectiva con sus lectores más importantes: los estudiantes. La mayor parte de este material se ha actualizado y reorganizado, muchas secciones y conjuntos de ejercicios se han reescrito por completo ...

Riemann Zeta Function. The Riemann zeta function is an extremely important special function of mathematics and physics that arises in definite integration and is intimately related with very deep results surrounding the prime number theorem. While many of the properties of this function have been investigated, there remain important fundamental conjectures (most notably the Riemann hypothesis ...

Este es un libro de Cálculo Diferencial e Integral de funciones cuyo dominio y/o codominio son subconjuntos del espacio  $R^n$ . Como a los elementos de este espacio se les llama "vectores", un nombre popular para este tipo de temas dentro del Cálculo es el de "Cálculo vectorial".
