It is this adoption of "completed infinity" as applied to Hilbert's 2nd problem that Brouwer complains about. The exact mechanism of the use of this is embedded in Hilbert's axioms. Kolmogorov discusses in detail Hilbert's "first axiom of negation" and his "second axiom of negation"

It saw the development of three major foundational programmes: the logicism of Frege, Russell and Whitehead, the intuitionism of Brouwer, and Hilbert's formalist and proof-theoretic programme. In this period, there were also lively exchanges between the various schools culminating in the famous Hilbert-Brouwer controversy in the 1920s.
