

## smart cards tokens security pdf

Many connected tokens use smart card technology. Smart cards can be very cheap (around ten cents) [citation needed] and contain proven security mechanisms (as used by financial institutions, like cash cards). However, computational performance of smart cards is often rather limited because of extreme low power consumption and ultra-thin form-factor requirements.

## Security token - Wikipedia

RSA SecurID, formerly referred to as SecurID, is a mechanism developed by Security Dynamics (later RSA Security and now RSA, The Security Division of EMC) for performing two-factor authentication for a user to a network resource.

## RSA SecurID - Wikipedia

BIOS Security. In 2011 the National Institute of Standard and Technology (NIST) released a draft of special publication 800-155. This document provides a more detailed description than the Trusted Platform Module (TPM) PC client specification for content that should be measured in the BIOS to provide an adequate Static Root of Trust for Measurement (SRTM).

The intent of this document is to provide supplemental information. 1 Information provided here does not replace or supersede requirements in any PCI SSC Standard.

## INFORMATION SUPPLEMENT Multi-Factor Authentication

API Reference. The Stripe API is organized around REST. Our API has predictable resource-oriented URLs, accepts form-encoded request bodies, returns JSON-encoded responses, and uses standard HTTP response codes, authentication, and verbs. You can use the Stripe API in test mode, which does not affect your live data or interact with the banking networks.
