Creating an XML electronic forms solution with an Adobe

A federated database system is a type of meta-database management system (DBMS), which transparently maps multiple autonomous database systems into a single federated database. The constituent databases are interconnected via a computer network and may be geographically decentralized. Since the constituent database systems remain autonomous, a federated database system is a contrastable ...

CoolSpools for IBM System i (AS400, iSeries): The complete information management solution. CoolSpools for IBM System i (AS400, iSeries) converts spooled files (spool files, spoolfiles) and database files to PDF, Excel and other formats, enabling you to move away from paper-based documents and save time and money by distributing information automatically in electronic formats.

CoolSpools IBM System i (AS400) Information Management

In computing, a solution stack or software stack is a set of software subsystems or components needed to create a complete platform such that no additional software is needed to support applications. Applications are said to "run on" or "run on top of" the resulting platform. For example, to develop a web application the architect defines the stack as the target operating system, web server ...
