Cell " Structure and Function BIOLOGY Notes 4 CELL " STRUCTURE AND FUNCTION

INTRODUCTION All organisms are composed of structural and functional units of life called "cells".

The body of some organisms like bacteria, protozoans and some algae is made up of a single cell while the body of fungi, plants and animals are composed of many cells.

have revealed the three-dimensional structures of many different proteins. Intrinsically disordered proteins lack an ordered structure under physiological conditions. Structural genomics is a field devoted to solving x-ray and NMR structures in a high throughput manner. The primary structure of a polypeptide determines its tertiary structure.
