A bullwhip consists of a handle between 20 to 30 cm (8 to 12 in) in length, and a lash composed of a braided thong between 1 to 6 metres (3 to 20 ft) long. Some whips have an exposed wooden grip, others have an intricately braided leather covered handle. Unlike the Australian stock whip, the thong connects in line with the handle (rather than with a joint), or even engulfs the handle entirely.
