

the human brain during pdf

The human brain is the central organ of the human nervous system, and with the spinal cord makes up the central nervous system. The brain consists of the cerebrum, the brainstem and the cerebellum. It controls most of the activities of the body, processing, integrating, and coordinating the information it receives from the sense organs, and making decisions as to the instructions sent to the ...

Human brain - Wikipedia

Human embryonic development depends on stem cells. During the course of development, cells divide, migrate, and specialize. Early in development, a group of cells called the inner cell mass (ICM) forms.

Why do we think we're so bad at maths, when we're all - almost all - born with brain circuits specialised for numbers? Our ability to use numbers has been the key from taking us from the Stone Age to the Phone Age. Trade, science and technology would be impossible without this ability. Neuroscientist Brian Butterworth argues that we are all born with brain circuits specialised for numbers.
