Laboratory quality control is designed to detect, reduce, and correct deficiencies in a laboratory's internal analytical process prior to the release of patient results, in order to improve the quality of the results reported by the laboratory. Quality control is a measure of precision, or how well the measurement system reproduces the same result over time and under varying operating conditions.

Laboratory quality control - Wikipedia

Alanine aminotransferase (ALT) is an enzyme found mostly in liver and kidney cells. ALT is released into the blood when the liver is damaged. The ALT blood test is often ordered in conjunction with aspartate aminotransferase (AST) or as part of a liver panel to screen for and/or help diagnose liver disease.

High LDL with low HDL level is an additional risk factor for cardiovascular disease. Measuring HDL concentration and sizes. As technology has reduced costs and clinical trials have continued to demonstrate the importance of HDL, methods for directly measuring HDL concentrations and size (which indicates function) at lower costs have become more widely available and increasingly regarded as ...
